THE MED SPA GOOGLE DOMINATION PLAYBOOK

Danielle & Ryan Kent, FNP-BC | Hello Gorgeous Med Spa | Oswego, Illinois

Google Domination Playbook

7 MODULES · LOCAL SEO · GOOGLE BUSINESS PROFILE · 40 FAQs · REVIEWS · KEYWORDS · DONE-FOR-YOU TEMPLATES

1

Why Google Is Your Most Valuable Employee

The patient journey always starts with a search — here's how to be what they find

87%

of patients Google a med spa before booking

73%

never click past page one of results

\$0

cost of organic Google traffic once you rank

The local search moment — what's actually happening

WHAT PATIENTS SEARCH RIGHT BEFORE THEY BOOK

- "Botox near me" — high intent, ready to book, goes to Google Maps first
- "Med spa [your city]" — comparison shopping, reading reviews, looking at photos
- "How much does Botox cost in [city]" — price-checking, will book the one that answers this clearly
- "Best injector [city]" — trust-based search, reviews and credentials matter most here
- "Is Botox safe" — education search, your FAQ page captures this patient before they even know you exist

The three Google assets every med spa needs

1

Google Business Profile

Your free local listing — the first thing patients see. Most spas have this at 40% completion. The other 60% is free traffic they're giving to competitors.

2

FAQ page on your website

Every question a patient Googles is a chance to rank. A well-built FAQ page can put you on page one for 30–50 different searches without a single paid ad.

3

Google reviews

Reviews are the #1 local ranking factor. More reviews + higher rating = higher placement in Google Maps. This is the single highest-ROI activity in local SEO.

THE HONEST TRUTH ABOUT PAID ADS VS. ORGANIC

Google Ads stop working the moment you stop paying. Organic SEO — your profile, your FAQ page, your reviews — keeps working forever. A med spa that invests 3 months in SEO has permanent free traffic. A med spa that only runs ads has a bill every month and nothing to show for it when they stop.

2

Google Business Profile — Your Free Superpower

The complete setup guide — every field, every section, exactly what to put

The GBP setup checklist — check off as you go

- ☐ Business name — exactly as it appears on your signage, no keyword stuffing
- ☐ Primary category: "Medical Spa" — this is the most important field on the entire profile
- ☐ Secondary categories: add "Skin Care Clinic," "Beauty Salon," "Weight Loss Service" as applicable
- ☐ Address — must match exactly what's on your website and every other online listing
- ☐ Phone number — local number preferred over 800 numbers for local SEO
- ☐ Website URL — link to your homepage, not your booking page
- ☐ Hours — complete and accurate, including holidays
- ☐ Booking link — add your scheduling URL directly to the profile
- ☐ Business description — 750 characters, include your city, top 3 services, and what makes you different
- ☐ Services section — list every service with a description and price range
- ☐ Photos — minimum 20 photos: exterior, interior, team, before/after, treatments in progress
- ☐ Q&A section — add your own questions and answers before patients do (see Module 3)
- ☐ Attributes — select all applicable: "Women-owned," "Wheelchair accessible," "Online appointments"
- ☐ Products section — add your top services as "products" with photos and prices

The business description — write it like this

GBP DESCRIPTION TEMPLATE

[Your Practice Name] is a medical spa in [City, State] offering Botox, dermal fillers, [your top services], and [additional services]. Led by [Provider Name], [credentials], we specialize in natural-looking results tailored to your unique anatomy and goals. We are a conservative, patient-first practice. Every treatment starts with a thorough consultation and ends with a complimentary follow-up. We

don't believe in the overdone look — we believe in you, refreshed. Serving [City] and the surrounding [area/communities]. Complimentary consultations available. Book online or call us today.

This description is keyword-rich (city, services, credentials) without feeling spammy. It also communicates your philosophy — which is what makes patients choose you over the competitor two blocks away.

Photos — what to upload and why each one matters

THE 20-PHOTO MINIMUM — WHAT TO INCLUDE

- **Exterior (3 photos):** front of building, signage, parking — patients use these to find you
- **Interior (4 photos):** reception, treatment room, waiting area — builds comfort before arrival
- **Team (3 photos):** provider headshots, team photo — faces build trust more than anything
- **Before/after (6 photos):** your best results — these are what patients actually click on
- **Treatment in progress (2 photos):** normalizes the experience, reduces anxiety for first-timers
- **Products/menu (2 photos):** service menu, featured treatments — helps patients know what to expect

NAME YOUR PHOTO FILES BEFORE UPLOADING

Google reads photo file names. Before uploading, rename every file with descriptive keywords: "botox-injector-chicago-il.jpg" or "med-spa-oswego-illinois-reception.jpg." This is free SEO that 99% of med spas skip entirely.

3

The 40 FAQ System — Stop Answering the Same Questions

Every question below is a Google search someone in your city is making right now

HOW TO USE THESE FAQs — TWO WAYS

First: Build a dedicated FAQ page on your website with all 40 questions — organized by service. Google indexes every question as a potential ranking opportunity. Second: Add the top 10 to your Google Business Profile Q&A section. Click "Ask a question" on your own profile and answer it yourself before a stranger does.

Botox & Neurotoxins — 10 questions

How long does Botox last?

Does Botox hurt?

How much does Botox cost?

When will I see results from Botox?

What should I avoid before Botox?

What's the difference between Botox and Dysport?

Can I get Botox if I'm pregnant or breastfeeding?

Will Botox make me look frozen or unnatural?

How many units of Botox do I need?

What can't I do after Botox?

Dermal Fillers — 8 questions

How long does filler last?

Does filler hurt?

How much does lip filler cost?

Can filler be reversed?

How soon can I see filler results?

What should I avoid after filler?

What is the difference between Botox and filler?

Is filler safe?

GLP-1 / Weight Loss — 6 questions

Do you offer semaglutide or Ozempic for weight loss?

How much weight can I lose on semaglutide?

Do I qualify for GLP-1 weight loss medication?

How much does the weight loss program cost?

What happens when I stop taking GLP-1 medication?

IV Therapy, Skincare & General — 16 questions

What is IV therapy and what are the benefits?

How often should I get IV therapy?	▼
What is microneedling and does it work?	▼
How long does microneedling take to work?	▼
What is a chemical peel?	▼
Do you accept insurance?	▼
How do I book a consultation?	▼
What should I expect at my first appointment?	▼
Are your providers licensed and certified?	▼
Do you offer a membership or loyalty program?	▼
What is microblading?	▼
Is there downtime after microblading?	▼
Can I bring a friend to my appointment?	▼
What is your cancellation policy?	▼
Do you offer gift cards?	▼
What makes your med spa different from others?	▼

Local Keyword Map

The exact search terms patients use — and where to put them on your website

How to use this keyword map

THE SIMPLE RULE

Replace [City] with your actual city name everywhere you see it. Use these phrases naturally in your website page titles, first paragraph of each page, image file names, and Google Business Profile description. Do NOT stuff keywords — use each phrase once or twice per page, naturally in a sentence.

High-intent booking keywords — put on your homepage and service pages

KEYWORD	SEARCH INTENT	VOLUME	DIFFICULTY
med spa [city]	Ready to book — looking for options	High	Medium

KEYWORD	SEARCH INTENT	VOLUME	DIFFICULTY
Botox [city]	Ready to book Botox specifically	High	Medium
lip filler [city]	Ready to book lip filler	High	Easy
medical spa near me	Highest intent — mobile search, ready now	Very High	Medium
Botox near me	Highest intent — mobile, ready now	Very High	Medium
best med spa [city]	Comparison shopping — reviews matter	Medium	Easy
dermal filler [city]	Ready to book filler	Medium	Easy
weight loss clinic [city]	GLP-1 / medical weight loss intent	Medium	Easy
IV therapy [city]	Ready to book IV	Medium	Easy
microblading [city]	Ready to book PMU	Medium	Easy

Educational keywords — put on your FAQ and blog pages

KEYWORD	PAGE TO TARGET	VOLUME	DIFFICULTY
how long does Botox last	FAQ page — Botox section	Very High	Easy
how much does Botox cost	Botox service page + FAQ	Very High	Easy
does Botox hurt	FAQ page — Botox section	High	Easy
Botox vs filler difference	FAQ page — comparison question	High	Easy
how much does lip filler cost	Filler service page + FAQ	High	Easy
semaglutide weight loss near me	GLP-1 service page	High	Easy
what is microneedling	FAQ page — advanced section	High	Easy
microblading healing process	PMU FAQ + aftercare page	Medium	Easy
what is IV therapy benefits	IV therapy service page + FAQ	Medium	Easy
chemical peel before and after	Gallery page + before/after	Medium	Easy

THE SECRET WEAPON — EDUCATIONAL KEYWORDS ARE EASIER TO RANK FOR

"Botox near me" is competitive. "How long does Botox last" is much easier to rank for — and the patient searching it is just as likely to book with you once they land on your page and trust you. Your FAQ page is your educational keyword goldmine. Build it, optimize it, and it will bring you patients for years without a single paid ad.

The Review Generation System

How to get 10 new Google reviews every month — without begging or bribing

#1

Reviews are the top local SEO ranking factor

4.5+

Star rating needed to compete in most markets

72hrs

Window to ask — after that conversion drops 60%

The 3-touch review system

1

The in-person ask — day of 2-week visit

Look them in the eye and say it out loud: "If you're happy with your results, would you be willing to leave us a Google review? It takes about 2 minutes and it genuinely helps people find us." Ask it in person before they leave. This is the most powerful moment.

2

The text link — within 1 hour of leaving

Send your Google review link by text immediately after the appointment while the experience is fresh. Use the template below. Include a direct link — not just instructions to "find us on Google."

3

The QR code — in every room

Create a QR code that goes directly to your Google review page (free at [qr-code-generator.com](https://www.qr-code-generator.com/)). Print it on a small card. Put one on the counter in every treatment room and at checkout. Patients who are happy will scan it on the spot.

Review request text templates

AFTER 2-WEEK VISIT — HAPPY PATIENT

Hi [Name]! So great seeing you today — you look amazing. ❤️ If you have 2 minutes, a Google review would mean everything to us. It helps other people find us who are looking for exactly what you just experienced. Here's the direct link: [Your Google Review Link] Thank you so much! 💕

NEGATIVE REVIEW RESPONSE TEMPLATE

Thank you for sharing your experience — we take every piece of feedback seriously. We're sorry your visit didn't meet your expectations. We'd love the opportunity to make this right. Please contact us directly at [phone/email] so we can speak with you personally. Your satisfaction matters to us and we want to resolve this.

Always respond to negative reviews within 24 hours. Never argue. Never get defensive. A calm, professional response to a negative review often impresses potential patients more than the negative review harms you.

How to get your Google review link

3 STEPS — TAKES 2 MINUTES

- Go to Google and search your business name
- Click "Ask for reviews" on your Google Business Profile panel
- Copy the short link — share it in texts, on cards, in emails, and as a QR code

6

Google Posts — The Feature Nobody Uses

52 done-for-you post templates — one for every week of the year

WHY GOOGLE POSTS MATTER FOR YOUR RANKING

Google rewards active profiles. Profiles that post regularly appear higher in local search results than inactive ones. Posts expire after 7 days — which means weekly posting is required to keep your profile "active" in Google's eyes. Most med spas never post. This is a free ranking advantage hiding in plain sight.

The 4 post types — rotate weekly

WEEK 1 — EDUCATIONAL

Teach something about one of your services. Answers a question patients commonly ask. Builds trust and authority.

WEEK 2 — PROMOTIONAL

Feature a service, highlight a special offer, or spotlight a package. Include a "Book Now" button.

WEEK 3 — SOCIAL PROOF

Share a patient result (with consent), highlight a review, or showcase a before/after. Let results speak.

WEEK 4 — BEHIND THE SCENES

Team photo, clinic moment, new product arrival, event announcement. Humanizes the practice.

12 ready-to-post Google Post templates

EDUCATIONAL — BOTOX TIMING

Did you know Botox takes 3–7 days to start working and reaches its full effect at day 14? If you've had Botox and you're not seeing results yet — be patient. The full picture reveals itself at the 2-week mark. That's exactly why we include a complimentary follow-up with every appointment. 📍 Book your consultation: [your link]

EDUCATIONAL — FILLER MYTHS

Myth: filler makes you look fake. Fact: poorly placed filler does. In the right hands, filler restores volume you've lost naturally — so you look like yourself, just more rested. We start conservatively,

follow up at 4 weeks, and never do more than what you actually need. 📌 Complimentary consultations available: [your link]

PROMOTIONAL — SPRING SPECIAL

Spring is here — and so is your glow. ✨ Book your Botox or filler appointment this month and receive [your offer]. Limited spots available — we fill up fast in spring. 📌 Book now: [your link]

EDUCATIONAL — GLP-1

GLP-1 medications like semaglutide and tirzepatide are changing the conversation around medical weight loss. Our program includes a full consultation with [Provider], monthly provider visits, dose management, and real support — not just a prescription. 📌 Complimentary consultations: [your link]

SOCIAL PROOF — REVIEW HIGHLIGHT

"[Patient first name] shared: '[excerpt from a real 5-star review]'" — This is why we do what we do. ❤️ Thank you to every patient who trusts us with their care. If you've had a great experience with us, we'd love a Google review — it helps other people find us. Link in bio. 📌 Book: [your link]

EDUCATIONAL — IV THERAPY

IV therapy delivers vitamins and hydration directly into your bloodstream — 100% absorption, no digestive system involved. Our most popular formula? The Myers' Cocktail — magnesium, B vitamins, vitamin C, and more. Most patients notice a difference within 2 hours. 📌 Book your drip: [your link]

THE FULL 52-WEEK TEMPLATE LIBRARY

This playbook includes the framework and 12 sample posts. Your Canva template pack includes all 52 Google Post designs — one per week, already designed, just add your photo and link. Post once a week and Google will reward your activity with higher placement in local search results.

7

Website SEO Checklist

25 fixes ranked by impact — all doable inside your existing website platform

Critical fixes — do these first

Page titles include your city and service — e.g. "Botox in Oswego IL | Hello Gorgeous Med Spa" — not just "Home" or your practice name

- ☐ **Every service has its own dedicated page** — Botox, filler, IV therapy, GLP-1, skincare — each gets a separate URL, not one giant "Services" page
- ☐ **Your city name appears in the first paragraph of your homepage** — Google needs to know where you are
- ☐ **Your NAP is consistent** — Name, Address, Phone number must be identical on your website, Google profile, and every directory listing
- ☐ **Your website is mobile-friendly** — test at search.google.com/test/mobile-friendly — over 70% of med spa searches happen on phones
- ☐ **Your website loads in under 3 seconds** — test at pagespeed.web.dev — slow sites lose patients before the page loads
- ☐ **You have an SSL certificate (https://)** — your website URL should start with https, not http. Google penalizes non-secure sites.
- ☐ **Your booking button is visible above the fold** — patients should never have to scroll to find how to book

High-impact content fixes

- ☐ **Build a dedicated FAQ page** — using the 40 questions in Module 3 — organized by service category
- ☐ **Add an "About" page with provider credentials** — full name, license type, state, training, and a real photo. Patients check credentials before booking.
- ☐ **Add before/after photos to every service page** — not just a gallery page — inline photos on the service page convert significantly better
- ☐ **Embed your Google reviews on your homepage** — use Elfsight or your website platform's review widget — social proof on the homepage increases conversions
- ☐ **Write meta descriptions for every page** — 150–160 characters that include your service and city — this is the text that appears under your link in Google results
- ☐ **Add alt text to every image** — describe what's in the photo plus your city — "Botox injection treatment at med spa in Oswego Illinois"
- ☐ **Create a blog or resources section** — even 4–6 articles per year significantly boosts SEO — topics: "How to prepare for Botox," "What is the Myers' Cocktail," etc.

Local SEO extras — done once, works forever

- ☐ **Submit to local directories** — Yelp, Healthgrades, RealSelf, ZocDoc, and your local Chamber of Commerce. Each listing is a backlink that boosts your authority.

- ☐ **Add Schema markup to your website** — tell your web developer to add LocalBusiness schema — this helps Google understand exactly what you are and where you're located
- ☐ **Embed a Google Map on your contact page** — boosts local relevance signals and helps patients find you
- ☐ **Add an Instagram feed to your website** — keeps your site fresh with new content automatically and shows social proof
- ☐ **Set up Google Search Console** — free tool that shows you which searches bring people to your site, and what pages Google has indexed
- ☐ **Set up Google Analytics 4** — free tool that shows how many people visit your site, where they come from, and what pages they look at
- ☐ **Add a "Book Now" button to your website header that's visible on mobile** — the single highest-converting change most med spa websites can make
- ☐ **Compress all images before uploading** — use tinypng.com — large images are the #1 cause of slow websites

START WITH THE TOP 8 — THIS WEEK

Don't try to fix all 25 at once. The top 8 critical fixes — page titles, individual service pages, your city in the homepage, consistent NAP, mobile-friendly, fast loading, HTTPS, and a visible booking button — will produce 80% of your SEO improvement. Do those first. Then work through the rest over 30 days.
